PROFESSIONAL SUMMARY

Experienced DevOps Engineer with a software engineering background and over 5 years of experience in cloud infrastructure, CI/CD pipelines, and automation. Skilled in Azure, AWS, and infrastructure automation, with a proven ability to optimize deployment processes and mentor teams. Seeking development or DevOps roles where I can leverage my engineering expertise, leadership skills, and passion for coding to drive impactful solutions and contribute to organizational growth.

SKILLS & LEADERSHIP

Leadership Experience: Vice President of Technology at Technology Management Laurier, Teaching Assistant at Wilfred Laurier University, Doon Pioneer Park Community Center Award, The Duke of Edinburgh Bronze Medal
Programming Languages: Python, JavaScript, Java, SQL, HTML, CSS, PHP, C, C++, Swift, Kotlin, VBA, R, Ruby
Frameworks & Libraries: NodeJS, React/ Redux, Rails, Express, Laravel, Django, MongoDB / Mongoose, jQuery, Bootstrap, SASS

WORK EXPERIENCE

Modernization & Microservices Integration Lead, Brock Solutions Kitchener, ON | Nov 2025 – Present

- Led cross-functional coordination between modernization and deployment teams, enabling smooth transition from legacy systems to microservices architecture
- Streamlined release processes and reduced deployment friction by aligning workflows across 12 custom projects
- Identified and mitigated migration risks, ensuring stable production releases during large-scale system transformation
- Improved visibility into release pipelines by tracking dependencies, blockers, and rollout progress across multiple teams

Software Deployment Lead, Brock Solutions Kitchener, ON | Sep 2023 – Nov 2025

- Mentored a team of 4 junior engineers to streamline production release management and delivery for 30+ live production applications, improving deployment efficiency and reducing handoff delays through automated support processes
- Spearheaded configuration process improvements to automate web application configuration during releases, using YAML-based deployment pipelines, increasing consistency across environments, and reducing configuration time by 30%
- Approved company-wide releases as a key member of the change review board, ensuring security, stability, and best practices
- Acted as the primary escalation point for over 120 upgrades, resolving critical bugs that prevented over 25 rollbacks
- Analyzed VM statistics to identify performance bottlenecks and improve message processing for high-traffic clients

Software Deployment Engineer, Brock Solutions Kitchener, ON | May 2023 – Sep 2023

- Collaborated with major airlines such as Southwest Airlines and British Airways to deploy mission-critical software, ensuring seamless travel for over 200 million passengers annually through efficient baggage handling
- Engineered custom Azure applications for new clients, accelerating their operational readiness by 75%
- Conducted rigorous testing on new software features leveraging an Android mobile client, web client, RabbitMQ, geo-replication, and database health, ensuring a deployment success rate of 99.98% through optimized feature validation

Software Developer, Golf Canada Oakville, ON | Aug 2021 – May 2023

- Developed a feature to display PGA and LPGA tournament information in the mobile app using Laravel which elevated spectator experiences, increased monthly downloads by 4 times, and increased tournament engagement hours by 50%
- Transferred websites to Amazon Web Services from Linode servers to increase server reliability & prevent recurring attacks
- Deployed software using AWS products, including Elastic Beanstalk, EC2, CloudFront, and S3, to scale server performance
- Converted a database of over 400,000 members to a cloud-based CRM software, rapidly increasing process speeds

Business Systems Analyst Co-op, Wilfred Laurier University Waterloo, ON | May 2019 – April 2021

- Utilized SQL Developer to generate reports, ensuring that management can make informed decisions on student admissions
- Evaluated scheduling software solutions to adapt to changing business needs during virtual operations, and developed training materials to successfully launch the software to all students and employees involved in the scheduling process
- Programmed and tested mobile applications using VBA and PowerApps to integrate cloud computing into international recruitment processes, making candidate data instantly available in real-time to 50 internal and external recruiters
- Saved 80 hours of manual labour per month by integrating SQL queries into Excel to automate residence-matching processes

EDUCATION

University of Toronto, Machine Learning Software Foundations Certificate Toronto, ON | 2024 - Present

Wilfred Laurier University, B.Sc. Computer Science, 3.6/4.0 GPA Waterloo, ON | 2017 - 2021
