

Ross Malcolm

Kitchener, ON | (519) 404-3340 | contact@rossmalcolm.ca | github.com/RossMalcolm | linkedin.com/in/ross-malcolm/

PROFESSIONAL SUMMARY

Experienced DevOps Engineer with 5+ years of experience in cloud infrastructure, CI/CD automation, and large-scale release management across high-availability production systems. Skilled in Azure and AWS, with a track record of improving deployment efficiency, reducing operational risk, and automating software delivery across complex production environments. Experienced in modernizing deployment workflows and supporting reliable, scalable software releases.

TECHNICAL SKILLS

Cloud & Infrastructure: Azure, AWS, Terraform, Docker, Kubernetes

CI/CD & Source Control: Azure DevOps, GitHub Actions, Git, Azure Repos, YAML Pipelines, Release Automation

Observability & Operations: Azure Monitor, Application Insights, Grafana, Incident Response, High Availability

Networking & Security: Azure Front Door, Azure Traffic Manager, DNS, Load Balancing, TLS/SSL, Azure Key Vault, RBAC

Messaging & Data: Azure Service Bus, RabbitMQ, SQL, PostgreSQL, SQL Server

Scripting & Development: PowerShell, Python, JavaScript, Node.js, Linux

WORK EXPERIENCE

Senior Software Lead, *Brock Solutions*

Kitchener, ON | Jul 2026 – Present

- Co-lead deployment operations across 4 team leads, driving resource planning, scheduling, and release strategy
- Developing agentic AI workflows to pre-screen production changes and automate post-deployment system health validation
- Own Change Review Board workflows and tooling, exposing internal APIs that enable other engineering teams to automate release processes
- Review configuration and database changes across production releases, providing technical oversight and mitigating deployment risk

Modernization & Microservices Integration Lead, *Brock Solutions*

Kitchener, ON | Nov 2025 – Jul 2026

- Led modernization and deployment integration across 18 projects migrating from legacy systems to microservices
- Standardized release workflows across modernization and deployment teams, improving release consistency
- Identified and mitigated migration, dependency, and production-release risks during large-scale platform transformation
- Improved release visibility by tracking dependencies, deployment blockers, and rollout readiness across engineering teams

Software Deployment Lead, *Brock Solutions*

Kitchener, ON | Sep 2023 – Nov 2025

- Mentored 4 junior engineers while managing releases for 30+ production applications, improving delivery efficiency and reducing handoff delays
- Automated system configuration, using YAML-based deployment pipelines, reducing manual release efforts by 45%
- Approved production releases as a change review board member, enforcing security, stability, and best practices
- Acted as the primary escalation point for 150+ upgrades, resolving critical bugs that prevented 30+ rollbacks
- Analyzed VM statistics to identify performance bottlenecks and improve message processing for high-traffic clients

Software Deployment Engineer, *Brock Solutions*

Kitchener, ON | May 2023 – Sep 2023

- Collaborated with major airlines such as Southwest Airlines and British Airways to deploy mission-critical software, ensuring seamless travel for over 200 million passengers annually through efficient baggage handling
- Engineered custom Azure applications for new clients, accelerating their operational readiness by 75%
- Validated releases across Android, web, RabbitMQ, geo-replication, and database systems with a success rate of 99.98%

Software Developer, *Golf Canada*

Oakville, ON | Aug 2021 – May 2023

- Developed Laravel features for PGA tournament content, increasing monthly downloads 4x, and engagement hours by 50%
- Migrated websites from Linode to AWS servers to increase server reliability and reducing recurring security issues
- Deployed and scaled applications, using Elastic Beanstalk, EC2, CloudFront, and S3

Business Systems Analyst Co-op, *Wilfrid Laurier University*

Waterloo, ON | May 2019 – Apr 2021

- Automated residence-matching workflows using SQL and Excel, saving approximately 80 hours of manual work per month
- Built and tested PowerApps/VBA applications that made recruitment data available to 50 internal and external recruiters

EDUCATION

University of Toronto, *Machine Learning Software Foundations Certificate*

Toronto, ON | 2024 - 2025

Wilfrid Laurier University, *B.Sc. Computer Science*, 3.6/4.0 GPA

Waterloo, ON | 2017 - 2021
